

Some people just can't
keep their mouth shut.

With its new StabilitySelector™, the **ComfortFull™** is the fully-loaded choice to help improve the lives of patients whose therapy is compromised by mouth breathing. And that's one more reason you can fully count on the Comfort Series to help you fit 100% of your patients 100% of the time.

t h e c o m f o r t s e r i e s ™

ComfortFull™

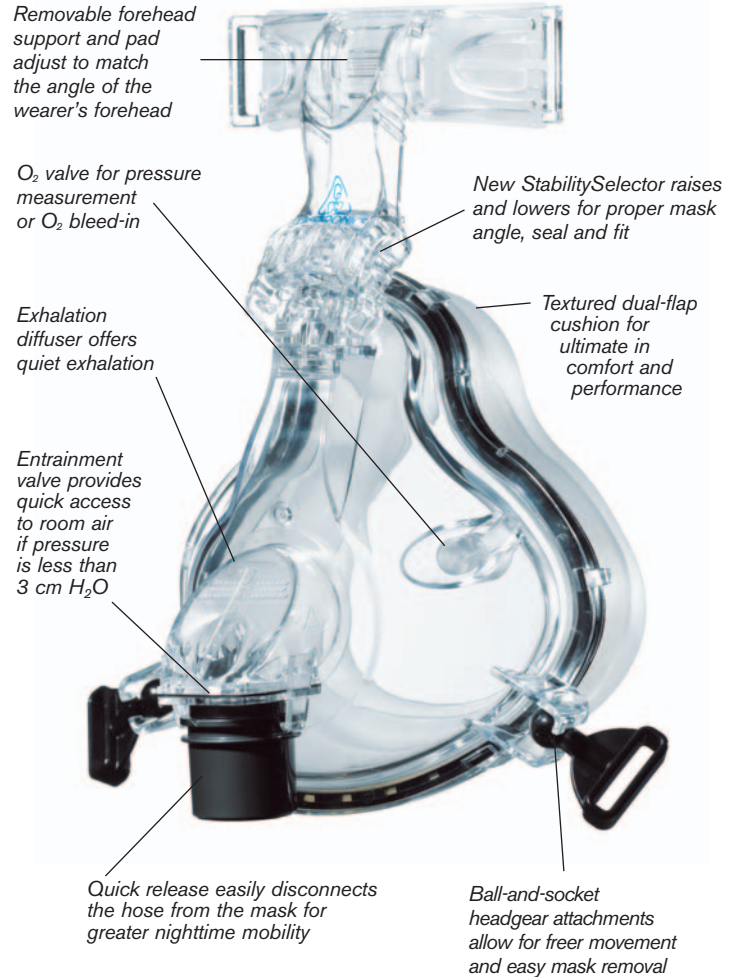

Full Featured For Full Comfort.

The ComfortFull™ has been designed to ensure the comfortable fit and effective therapy patients need to maintain compliance. It gives you a better option for patients who have difficulty complying with nasal mask therapy due to mouth breathing. And, it sits lower on the nose, eliminating pressure on the nose bridge.

To help make it the most comfortable and best-performing full face mask, the ComfortFull features the new StabilitySelector™ that tilts the mask to allow for an optimal seal and comfort – without overtightening the headgear. The quick-release hose swivel and ball-and-socket headgear clips also provide increased nighttime mobility and extended ease of use. Combined with a soft dual-flap cushion and the new ComfortHeadgear™ these features make ComfortFull the best option for a full face mask.

The ComfortFull can be a better option for your business, too. Through a full range of features, ComfortFull provides you the value of increased patient compliance, less callbacks or complaints, and a wide range of adjustability that allows for fewer sizes and less inventory.
